Praiseworthy Effort
"I'm doing my best to get ahead," asserted Dolly.

"I wrote this poem to kill time." "Well, you may be right that time will have revenge and kill the poet."

British Optimism

Mr. Lloyd George does not conceal the truth about the horrors of war nor ignore the risks to be run, but he does not let them dominate his policy, nor is a major key to his policy. His does not lessen their impressiveness by which was applied in "optimism" which with such mighty effort has thus created in his country a sort of optimism both noble and practical, that British optimism which has borne such splendid fruit in this extraordinary war—Lie. Egerton, Paris.

Minard's Liniment Cure. Distrometer.

A Generous Offer

Well-Known Firm Is Giving Away
Free Samples for the Asking

This is in many respects a variously placed upon the market, some of which enjoy wide-spread reputations, with the popularity of others but transient. While there is there a strong disinclination to experiment and the wise man or woman will usually make use of a remedy that has been well-recommended, it is perhaps no better known or more reputable firm of manufacturing chemists than that of Dr. Cassell's Co., Ltd., Manchester, England. Particulars of their products will be given to those who have come to Canada from the mother country. Dr. Cassell's Tablets is not a new remedy but it has been well-proven and the numerous testimonials bear ample verification to this fact.

Although this striking remedy is known to the majority of people, yet to those who have not put it to the test, the proprietors will gladly send a free sample on receipt of a postcard to cover postage and packing. In writing for the free sample, address correspondence to Harold F. Ritchie & Co., Ltd., 10 McCaul street, Toronto.

The Lance Bomb.

This remedy is highly recommended in the treatment of Dyspepsia, Kidney Trouble, Stomachaches, Anæmia, Nervous Afflictions, Nerve Paroxysms, Palpitation and weak heart conditions. The reader who may be suffering can do better than wait at once to the above address and secure a generous sample of this of remedy entirely without cost.

"I haven't had a bite for two days," said the tramp. "Neither have I," responded the sunburned bather. "Rotten fishing around here."

"The worst part of being a bather is that when I die my name dies with me."

"What is your name?" "Smith."

"Every man should know something about fishing," said the tramp.

"But he oughtn't to neglect other things. I just took my boy Josh's shotgun away from him and told him to keep busy with the hot."

"How does yo' like mard life, sal?"

"Uh-well, sal, it has its sorrows, but at dat, it beats workin' for a livin'!"

**Use Lance Bombs
As Chasers for U-Boats**

Britain's Mosquitos Fleet Armed With Novel Weapons

The armament of Great Britain's 800-ton "cruisers," (M.L.'s) which are called "mosquitos" because they carry a deck gun, a "depth charge," six "lance bombs," and a rifle for each of its ten men. The deck gun is a quick-firing, mounted for this purpose, and firing a shot which weighs about thirteen pounds. The regulation 3-inch navy gun has a tremendous recoil pressure and requires a crew of twenty men to handle it. The modified gun is lighter and shorter, simpler to handle, and, while with its long recoil it sacrifices extreme velocity, it is sufficiently powerful for greater ranges possible in small-scale action, and the ability to shoot such a husky shell is alone ample compensation.

The depth charge is 30 ft. long, set to explode at any predetermined depth of water. This highly-respected shipmate is dropped in the vicinity of a submerged submarine to blow in its hull or damage its delicate internal economy.

The story of the lance bombs goes like this: A British destroyer was once operating in the embarrassing position of having a torpedo boat hold it right alongside. It was impossible to depress the guns sufficiently to strike the stranger, and there was nothing else to do but wait for the captain to tell the destroyer I can't say, but it must have got away to tell the story for each boat is now provided with lance bombs for just such emergencies.

The lance bomb is a 14-pound contact bomb on the end of a 6-foot handle, the idea being to use it at close range by holding it out and striking the hull.

These implements loaded with awful possibilities in the hands of an amateur, and the surest road to unpopularity with one's shipmates is to sell them lance-bomb rehearsals.

William Nutting in Collier's Weekly:

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dredged up from the depths of the ocean, and aggregate loss of over \$75,000. These, like the majority of fires, might have been prevented by the exercise of intelligent forthrightness and proper care.

Investigation shows that the most prolific sources of barn fires are lightning and spontaneous combustion. Evidence gathered from India, Australia and the United States proves that rodded buildings are practically immune from lightning damage. The cost being a mere fraction of the possible loss in case of fire, the economic importance to the farmer of every barn should be efficiently protected by lightning rods.

During the years 1912-1916, in less than 5,200 barns were destroyed by fire, causing an aggregate loss of over \$75,000. These, like the majority of fires, might have been prevented by the exercise of intelligent forthrightness and proper care.

Investigation shows that the most prolific sources of barn fires are lightning and spontaneous combustion.

Evidence gathered from India, Australia and the United States proves that rodded buildings are practically immune from lightning damage.

The cost being a mere fraction of the possible loss in case of fire, the economic importance to the farmer of every barn should be efficiently protected by lightning rods.

**Lightning Rods
And Barn Fires**

During the years 1912-1916, in less than 5,200 barns were destroyed by fire, causing an aggregate loss of over \$75,000. These, like the majority of fires, might have been prevented by the exercise of intelligent forthrightness and proper care.

Investigation shows that the most prolific sources of barn fires are lightning and spontaneous combustion.

Evidence gathered from India, Australia and the United States proves that rodded buildings are practically immune from lightning damage.

The cost being a mere fraction of the possible loss in case of fire, the economic importance to the farmer of every barn should be efficiently protected by lightning rods.

**LIFT YOUR CORNS
OFF WITH FINGERS**

During the years 1912-1916, in less than 5,200 barns were destroyed by fire, causing an aggregate loss of over \$75,000. These, like the majority of fires, might have been prevented by the exercise of intelligent forthrightness and proper care.

Investigation shows that the most prolific sources of barn fires are lightning and spontaneous combustion.

Evidence gathered from India, Australia and the United States proves that rodded buildings are practically immune from lightning damage.

The cost being a mere fraction of the possible loss in case of fire, the economic importance to the farmer of every barn should be efficiently protected by lightning rods.

**How to loosen a tender corn
or callus so it lifts out
without pain**

Let folks step on your feet hereafter, wear shoes a size smaller if you like, for corns will never again send electric sparks of pain through you.

My son, a young lad, suffered from a severe case of corns, and the doctor said he must have new found health and strength through these pills.

G. Strasser, Acton, West, Ont., says: "I am the mother of three children, and our baby girl has come terribly run down, I had weak, thin, blood, always felt tired, and unable to do my housework. After taking a pint of these pills I began to be worse, and was very badly run down. I found the greatest benefit from the pills and soon gained my old strength back again. I feel as well as in my girlhood, and could take pleasure in my work. I also used Baby's Own Tablets for my little ones and have found them a splendid medicine for children."

This drug dries at once and shrivels up the corn or callus without ever irritating the surrounding tissue.

A small bottle of freezeone obtained at any drug store will cost very little, but will positively remove every hard or soft corn of callus from one's feet.

If your druggist hasn't stocked this new drug yet, tell him to get a small bottle of freezeone for you from his wholesale drug house.

Dr. Williams' Pink Pills are sold by all dealers in medicine, or you can procure them by mail at 50 cents a box, or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

An Increase of Settlers

Over 2,000 More This Year As Compared with May, 1916

The returns from the ports of entry received by the Bureau in May show a wonderful increase in the number of Americans who have crossed into Canada through the western ports of entry during the month.

Statistics indicate that 1,000 or more settlers entered the three western provinces during the month of May this year than in May, 1916.

There was a marked increase in the number of effects, and the total wealth of the incoming people is over three times that of the month of May last year, being \$645,174.

The figures for May, 1916, were: Settlers 881; cars of effects, 52; valence effects, 100,017; wealth of settlers, \$209,580. The figures for the month of May this year are: Settlers 1,901; cars of effects, 91; wealth, 1,000,617; wealth of settlers, \$645,174.

The three principal ports of entry are Emerson, Man.; North Portage, Man.; and Cochrane, Alta.

The figures for the month of May this year are: Emerson, 1,000; settlers 1,607; cars of effects 26; valence effects \$30,000; wealth of settlers \$137,944.

North Portage, Settlers 411; cars of effects 34; valence effects \$47,630; wealth of settlers \$147,494.

Cochrane, Settlers 418; cars of effects 25; valence effects \$34,590; wealth of settlers \$334,500.

The number of settlers coming into the west is the farming class, and most of the heads of families who crossed during the month of May came to Canada for the express purpose of settling on western farm lands.

A large amount of stock is being brought over so that the farmers can start right at their work as soon as their shacks are built.

No Fear of Food Overproduction

It is for the sake of the overproduction of foodstuff that the Toad gets it is mischievous. Anything that tends to discourage farmers from planting every acre possible or chilling the zeal of home gardeners will reduce the supply in winter and make certain higher prices.

The country has been aroused by the knowledge of world-wide shortage, and this condition would not be changed if peace were declared tomorrow.—New York World.

Minard's Liniment Cure. Gargle in Cow's.

"Everything is going up."

"Yes," said the poet. "Yesterday a literary lady offered me a nickel for my thoughts."

"Anything on this evening, old man?"

"Ratsher! Until bedtime."

Freak Inventions

Crazy Patchwork Ideas That Have Been Patented

Among the inventions that one wonders who could be so mad as to wish to initiate, yet that men have actually gone to the trouble to patent, is built on a piano and very bony. It is built on its head to wind up the instrument.

Among others of these freak inventions, is a "pedal clarifier" with which the man blows his nose to warm them. It is a tube worn under the clothes with a branch leading to each foot and a mouthpiece at the end. There are a polished or false teeth—merely the end of a corn-cob stuck on a stick; a sanitary locker for carrying chewing-gum; a billiard ball which, by means of a noiseless alarm clock the yanks the sleeper's arm instead of ringing, another that starts a mechanism which throws him out of bed, a telephone 250 pounds in weight, which are laid and a medicated net-sack.

Others are a device to be attached to locomotives which, when train drivers attack them with a live steer, will cause the engine to stop.

WAR WILL CONTINUE LONG TIME IS OPINION OF MANY AUTHORITIES

LORD NORTHCLIFFE VENTURES A PREDICTION
Believes that the War is Just One of a Series, and that Political Upheavals and Revolutions will Occur in Most of Belligerent Countries, and Conditions will Improve

More than a year ago, a prominent Toronto soldier, burning wounded, replied to the question of a bore as to the length of the war: "Well, I don't know how long it will last, but I think the first seven years will be the worst." At the time the report was made, the proper answer was, "Star, har!" Now, there is another answer. Several authorities are predicting that the conflict will last for two or three years more. The man who has given the most credit to Lord Northcliffe's forecast is himself, and he has been astonishingly correct as regards the development of the war in many ways. He thinks the war will continue for some time to come. In an article he contributes for the New York Tribune he makes a comparison with the American Civil War. He says that in the conflict between the United States and the Confederacy, the war was unready and that it continued for four years. At the outset it had been expected by some optimists, to last six months. He adds: "It is clear that the measure of preparedness is to be considered when the probable length of the war is being discussed. In other words, if the unprepared, untrained, untried, tremendous odds, can last four years, how long can Germany hold out, having prepared for forty years?"

When Lord Northcliffe writes for the American press, he always disclaims his right to speak as an American reader, which is natural for any writer. He also wants American readers to love him, and in the process he has done so. The Lord Northcliffe is doing a good work in the United States through the medium of the papers which carry his opinions to the public. Two years ago his predictions were found to be correct, and he had made them. So if today or tomorrow he seems to be unduly fond of American methods, we can only hope that he will not be faulted, nor will he hesitate to speak as frankly to the American public as he did to the British public.

He looks for a long war. He says that the three great revolutions of the world have been the wonderful defense put up by the entrance of five British nations into the war on the side of England—Canada, Australia, New Zealand, South Africa, and India—and the slow arousing of the United States and its entry into the fray. He says it is reflected in the submarine campaign that in England they do not take it seriously enough, and that in the United States they take it too seriously. He contends that the submarine cannot win the war. He compares it with the attack upon Canada and the attack upon Paris. They were, in his opinion, mere secondary thoughts, devised after the grand plan of the German army had failed. The grand plan was the capture of Paris.

Lord Northcliffe says that the war is just one of a series of wars. The submarine campaign he considers a mere插曲, and he asks his readers to imagine that the allies are dealing with a cabal, or, in other words, with a state which spans no continent, but which is intent on world domination. A few days ago the Queen of Greece said that her brother was fighting for his dynasty. In the fight he has with him the ruling classes of Germany, and they feel compelled to fight for their lives. When a cabal is fighting for its life it is idle to suppose that it will take into account any ruler of the game. The recent German orders to all hostile ships will be sunk is an illustration of the point raised by Lord Northcliffe. We in Canada have not yet come to this pass. We are fighting for our country, or for our country, or for democracy, or for representation by population, or for the greatest good to the greatest number, or for some other noble abstraction. We fight well, but we do not fight for our lives. That is why Germany is fighting, and we have to fight the way Germany is fighting before we can beat Germany—Toronto Mail and Empire.

Maud—Miss Oldun thinks that hotel clerk just loves you.
Ethel—Why so?
Maud—He wrote opposite her name on the hotel register. Suite 16.

Russian Monks to be Sent to the Battlefront

Criminal Prisoners Allowed to Join the Army

All the monks of Russia will be sent to the front to serve in the department of sanitation according to a decree issued by the Russian ministry. Lay brothers will be recruited as soldiers. Recently the monks demanded equal political rights, the right to vote, and the right to change the vote, and they have been giving other marked evidences of revolutionary zeal.

Five hundred criminal prisoners in the cities of Novgorod and Nizhniy Novgorod have petitioned the government that they be sent to join the army. A special commission has examined and accepted 300 of those who signed their petitions.

A novel measure to suppress thievery in the soldiers' barracks has been put into practice in Petrograd. A captain that was forced to walk the streets of the Petrograd barracks placards with the inscription: "I stole sugar and shoes from the soldiers. After the ordeal he was given a chance to go to his regiment again and promise to be good. A similar story comes from Bessarabia, where a clerk of the war organization was accused of being a thief. A yokel played about his neck.

The palace of Kshesinskaya, property of the dander and favorite of Empress Nicholas, had served as a stronghold for the adherents of Nikolai Lorraine, the radical Socialist leader, in their plot against the Emperor.

Himself, for the prize of the best-armed man in Petrograd, he said that his criticism of the British administration was right. His papers were restored to popularity. Soon it became apparent that his criticism had been adopted. So if today or tomorrow he seems to be unduly fond of American methods, we can only hope that he will not be faulted, nor will he hesitate to speak as frankly to the American public as he did to the British public.

Following the example of three hundred agents of Illinois Agricultural College, who are in Western Canada, helping in agricultural operations, nearly 100 stout-limbed boys down in Pasadena, California, are working on farms for the summer to help out on the farms, says the Edmonton Journal. The physical director of the high school in that city has written to the students: "If you are not a boy who has any need of their services in the Edmonton district or other parts of the province, he says the boys are between sixteen and twenty-one years old, and he felt the promising young men applied to them as a first choice is a pleasant indication of the feeling across the line toward this part of allied Canada, and Second Field Artillery, and the Californiaans that their action is appreciated.

It is possible, however, that the harvest season in Alberta will be too late to come while the school holiday period, and so the officer may not prove acceptable.

Advertising Aids Canada In Prosecuting War

Expenditure has Exceeded That of All Four General Advertisers

The advertising campaigns conducted by the Canadian government as aids to the successful prosecution of the war were described to the Associated Advertising clubs of the world at the St. Louis convention recently by John M. Irvin, manager of the Canadian Press Association.

Says the war began, he said, "that the Canadian government has conducted seventeen distinct advertising campaigns. During the last twelve months its expenditures on display advertising exceed the combined general expenditure during that period of any other four general advertisers in Canada. Most of the advertising was done in connection with Canada's war problems."

Mr. Irvin related how the government had advertised in newspapers throughout Canada the food value of Canadian apples, which created much interest in the large crop of 1915. Now, through advertising, a fund of thirteen million dollars for the relief of families of soldiers had been raised, and by other means, which had been secured for the manufacture of munitions.

Mr. Irvin continued: "Soon after the war began it was recognized that the most valuable contribution Canada could make to the prosecution of the war would be in the form of food supplies. The problem was to impress the people in Canada with the fact that this great democracy, in its due manner and his work, he more than realized expectation. Here was a great British statesman, equal to his place in importance."

The American expressions of him are the same. He was received with enthusiasm that must have surprised him, a modest, shy man, unused to popular applause.

Mr. Irvin continued: "The personal dignity and urbanity in the ability of a long, brilliant career, in his manly, thoughtful speech, to the purpose and without glitter of rhetoric, by his modest response to questions, charged with generous emotion that clearness, grace, sobriety and good taste that are characteristic of him. He spoke with a simple, straightforwardness that the work done by the government, by the president, the American war work so far. He was just to the country. He was just to the people. He described the people as something of secondary importance the highly knotted ties that one crew of men all three in the capital of the New East. Even in the gloom of the present war will be the beginning of preparations for a war even greater.

Life in a "U" Boat.

Sea Pirates Do Not Have a Very Hard Time

There is a widely prevalent idea that a submarine being a cramped and dangerous sort of craft, life must of necessity be a hard thing for its crew.

This opinion goes astray in that it leaves out of account the changes which have taken place. The least notable of these is a great improvement in living accommodation. So much has this been bettered that the commandant of a modern U-boat can move more comfortably in his cabin than the crew of a Hun destroyer. For while the latter must face bad weather, as faces the crew of all the "U" boat can see ease by going down until conditions improve. She may "sleep" up to the surface, if the weather permits, for that, submerge so far that no wave motion longer affects her. Her crew need not risk sea-sickness.

Admitted that is only part of the story. One may avoid rough weather and still find life afloat anything but joyful. Such matters as food, water, heat, and general environment are factors not to be overlooked.

One might imagine that being boxed up in a steel cylinder for hours at a time would be a punishment of the severest kind. It does not. In fact, so far as the men inside her are concerned, the men of a "U" boat does not do so badly if from general environment we miss out the British sailors' stories of the bunch of bitter herbs in Hans the Bucaneer's otherwise passable soup.

Start ADVERTISING !NOW!

Stagnation of one's business is greatly to be feared and greatly to be avoided. Action—an effort to get ahead—keeps a business healthy, wealthy and wise.

Visible action is advertising in the local weekly paper—a fresh advertisement each week. The preparation and publication of a new advertisement is a sure indication of business energy.

"Start Something" is the slogan of today. Start advertising NOW. Keep up the advertising and your business will feel the tonic effect of your action.

To The Merchants of The Pass:

Make business brisk for you and your town by a big and rightly-directed effort—by a series of adequate advertisements in this paper.

Get and Keep Ahead By Planning Ahead !

Bellevue Happenings

BORN—To Mr. and Mrs. William Stoff, a son.

James Alexander was visiting friends at Fernie this week.

A Hallworth and family spent Thursday at the Lundbreck falls.

Mr. Wright, of Macleod, is visiting his sister here, Mrs. B. Dryden.

Mrs. George Christie returned this week from Red Deer, where she had been visiting friends.

Mr. and Mrs. Joseph Robinson, after spending some time at Vancouver, returned home this week.

George Cantelieu has sold his business here to M. Danisch and John Stiffany, who are now in charge.

Rev. Arthur Barner, superintendent of Methodist Missions for Alberta, was down from Calgary during the week.

W. Brayton, who has been in Bellevue for some time, left this week for the Brooks district, where he has secured a job.

A number of Bellevue I.O.O.F. members journeyed to Coleman on Monday night to be present at the installation of officers of Coleman Lodge.

Mr. Williams, of the Bellevue Bakery, made a business trip to Saskatchewan this week in connection with his property which was destroyed by fire.

The little child which was attacked by a Big Dane dog last week, is still lying in a precarious condition. The dog has been shot and the head forwarded to Edmonton for analysis to decide whether or not there are symptoms of hydrophobia.

A number of Bellevue ladies gave a surprise party at the home of Mr. and Mrs. John Hutton, in honor of their son, Pte. John Hutton, who lately returned from England, where he had been in hospital for some time, suffering from wounds received in France. He was a sniper and went overseas with the 54th battalion from Vernon, B.C. A very enjoyable evening was spent in games and singing.

Slot Machines

Are Illegal Now

As a result of a recent decision by the Supreme Court upholding a magistrate's decision to the effect that slot machines are illegal in this province, the Alberta provincial police are notifying all owners of such machines in the small towns that they are under the ban. Three Chinamen were recently prosecuted in Claresholm and were fined \$25 and costs as a result of the new ruling. In the cities the city police forces deal with the matter, and if they are allowed to operate it is in defiance of the law.

Local and General

The sale of war savings certificates in Canada has now reached \$9,000,000, being an average of \$1,500,000 a month since the certificates were first advertised.

While bathing in Seven Persons creek near Medicine Hat last week, Albert Littleford, aged sixteen, got into a hole and sank. Jack Campbell, aged twenty-seven, jumped into the river to save the lad and was also drowned.

In referring to Private Williams in our issue of last week we were slightly in error in stating that Pte. Williams enlisted at Sarcce last year. We understand that Pte. Williams joined the 13th at Medicine Hat in 1915, and has since been through some of the heaviest fighting at the front.

All the men were called out of the mines at Coleman by the authorities on Tuesday of this week to fight fires. Fire approached within about seven miles of the town and for a time looked threatening, but the presence of over four hundred men on the grounds for several days and nights seemed to have the effect of preventing a further spread in that district.

DECLINED \$7,500 SALARY TO SERVE PUBLIC FREE

MR. JOHN G. KENT, a man of wealth and extensive business interests, who has refused to accept any remuneration whatever for his services as General Manager of the Canadian National Exhibition, preferring to serve the public free of charge. He is President of the Toronto Board of Trade and has been a member of that board since 1905, always showing a close interest in the work. He was President in 1912-13, the two best years in the history of the C.N.E.

Mr. Kent is head of the Boy Scouts of Canada and identified with many philanthropic enterprises. Long and continued illness has compelled Dr. Orr, Manager since 1902, to seek a long rest.

Cowley Happenings

Timothy cutting is general here now. The crop is light.

Miss Alline Iredale and Mrs. Otto Iredale are visiting friends here now.

Mrs. Connor and daughter Cecil are visiting friends in the district at present.

Mrs. G. Woodhead is enjoying a visit from her parents, who reside in Manitoba.

J. Littleton, of the Union Bank at Macleod, was up to take in the U.F.A. picnic.

Several of the locals took in the picnic at Crows' Nest on Wednesday of last week.

Mr. and Mrs. Fred Tustian are entertaining guests from Iron Springs this week.

Catching grasshoppers seems to be one of the orders of the day now, most everybody going fishing.

Master Phillips, who has been the guest at the Carney residence for the past two weeks, returned to his home in Coleman on Sunday morning.

By the way the farmers drove to the picnic in their motor cars so that at last they have come into their own and are the aristocrats of the day.

F. W. Godsal's sale, held on Tuesday of last week, was well attended. Everything was sold. The Women's Institute served lunch on the grounds and cleared a tidy sum.

The Women's Institute will hold their next meeting on the 28th. Mrs. A. Betts, who has recently returned from England, will give a paper on "Present conditions in England."

Among the Pass people who were in attendance at the U.F.A. picnic, we noticed C. W. Johnston and family, Corporal W. Howe, Miss H. Ennis, Mr. and Mrs. J. F. Lank, Rev. J. Fulton and W. J. Bartlett.

Considerable anxiety was aroused at the U.F.A. picnic on Wednesday evening of last week at the disappearance of a little child belonging to Mr. and Mrs. Dwyer. After search parties had been constituted, the little one was discovered near the road about a mile from the picnic grounds.

The U.F.A. picnic, held on Wednesday, proved an unqualified success. The attendance was the largest yet, and the weather was just ideal. The programme was

Blairmore Hardware Co.
Agents for Crows' Nest Pass.

pulled off without a hitch and some particularly good contests were witnessed. The last item on the field programme was the baseball match between Cowley and Pincher Creek teams which was closely contested and resulted in victory for the locals with a score of 3 to 2. The teams were very well matched. Towards evening the terpsichorean artists and other would-be's, to the number of over one hundred, repaired to Coate's barn, where the entire upper and lower floor space was cleared for dancing. Excellent music was furnished by the Pincher Creek orchestra, and a joyous climax to a successful day resulted. One very noticeable feature of the day was the fact that thirty-six motor cars were on the grounds as compared with one or two at a similar picnic three years ago. The male waitresses, Messrs. Franz, Sheffield and Shepherd, at the refreshment stand, were kept more than busy during the day, and were obliged to dump old boxes, paper and straw into the river in order to avoid selling them to the swarm of hungry or curious customers.

Famous Soprano at Chautauqua

Olive McCormick Soloist With Chautauqua Orchestra

ONE of the rarest treats among our Chautauqua musical attractions will be Olive McCormick, soprano soloist who sang with the Chautauqua Orchestra. Miss McCormick sings the most difficult soprano roles with surprising ease. Her fame in the musical world first became widespread with her first three triumphal engagements as soloist with the Pittsburgh Symphony Orchestra.

Such artists as Olive McCormick upon the Chautauqua platform possess musical and educational values impossible to estimate.

Redpath SUGAR

From "Ye Olde Sugar Loafe" of grandmother's day, to the sparkling "Extra Granulated" in your own cut-glass bowl, Redpath Sugar has appeared three times daily, for over half a century, on thousands of Canadian tables.

"Let Redpath Sweeten it."

Made in one grade only the highest!

Dynamite Saves Potatoes

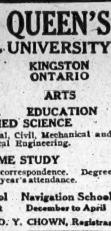

A resourceful farmer found a new way to use dynamite that saved a newly-matured crop of potatoes in a badly flooded field. Using hand pumps, all the neighboring drains and ditches; in this emergency the owner put down a number of holes which quickly fell deep with a few charges and exploded the charge of dynamite in the bottom of each. This opened up passages into the sandy subsoil, through which the surplus water could escape, and the crop was saved, although many nearby crops were ruined by the excess of water standing in the fields.

Price, per pamphlet, add \$1.00 postage.

Dr. COKE'S COTTON ROOT COMPANY, Oak, Ontario, Canada.

Big Price For Range Stock

The high prices of wheat and other grains, which have brought such prosperity to farmers in Western Canada, should not be allowed to distract attention from the profits which can be made in raising cattle and stock raising. An example of the very satisfactory returns received by the stock farmers is given in the experience of Mr. C. C. Dodd, of High River, Alta., who sold 91 head of cattle a few days ago and received in return a check for \$12,398.75, making an average of \$136.25 per head.

Tennyson Named Empire

Great Britain Is a "Crowned Republic" Because of Its Constitution

Although H. G. Wells has been singing the praises of the crowned republicanism of a country who goes by this phrase, the difference between our form of monarchy and that which has fallen in Russia, and that is doomed to fall in Germany, is great, he suggested. The Kaiser had longed Australia in his dominions, would have allowed that congeries of colonies to amalgamate under such a title as the "Commonwealth of Great Britain." The fact alone is proof positive that, although we have a king, we are republicans.

We do not always realize that our constitutional law has changed in the years older than the famous American constitution, which was avowedly framed on the British model, although at the time they were at war with their mother country.

It was the Bill of Rights, by which parliament passed, "Dutch William" and his wife Mary joint sovereigns of England which made this realm a "crowned republic." From the moment the Bill of Rights gave us a constitutional government, the colonies of New France, New Netherland and Germany still know, despite the mockery of its Reichstag, was broken, and the nerve centres of tyranny were paralyzed. Therefore we were a crowned republic! —Answers.

Kaiser Planned

Huge Empire

Returned American Says Turks Built a Big Palace in Palestine

A palace built in Palestine, from which the Kaiser would rule his world empire, is one of the stories brought back to America by Dr. Clarence Ussher, a Canadian who, as a commissioner, who has worked with the Armenians during a large part of the war. He told an audience recently that this was the boast of Turkish soldiers, and he believed that it would come to pass.

After giving intimate descriptions of the massacres of the Armenian population, Doctor Ussher said that he thought that at least one-half of the killed, if not more, were in favor of the allied cause, but that the Young Turk party, trained by Germans to German methods, had controlled the destiny of the empire—New York Sun.

"Your wife, sir, seems to be subject to fits of asthma,"

"Good heavens, doctor, I never thought she had anything the matter with her except she talked too much!"

Minard's Liniment Cures Diphtheria:

His Mouth Is Full

The French, with their ready appreciation of humor, in other places are using the language of fun about the British troops. "For thirty months," says an expert military writer in the Paris Press, "the British soldier has been fighting his master and his superior. He is; he does not say much about it, his friends abroad will remember that it is impossible to bite and talk at the same time." Editorial in London Times.

Most infants are infested by worms, which cause great suffering, and if not promptly treated may cause constitutional weaknesses difficult to remove. A simple remedy will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

Counting Seconds

An easy method of counting seconds that is accurate according to physiologists, is to repeat the phrase that it takes one second to pronounce. The majority of people will require one second of time to pronounce the word "one," and a fraction, say, as clear enunciation will permit. The last word of the second should always indicate the number of seconds that have been counted. So, second time instance should be counted one hundred and one, one hundred and two, one hundred and three, one hundred and four, one hundred and five, one hundred and six, and so on, until you can count from thirty to sixty seconds without varying more than one or two seconds from the time recorded by a watch.

The Original Fruit Canners

We are indebted to Pompeii for the great industry of canned fruit. Years ago, when the excavations were just beginning, a party found in what had been the pantry of a house in Pompeii jars containing preserved fruit. These were found to be fresh and good. Investigation showed that the figs had been put into jars in a heap and an open fire had been built over them to dry and then sealed with wax. The wax was taken, and the next year fruit canning was introduced into the United States, the process being identical with that at Pompeii.

WINNIPEG MAN CURED

Says Dr. Cassell's Tablets Saved him from Nervous Breakdown

Mr. G. C. Tamm, 1200 Main Street, St. John's Creek, Winnipeg, for many years well-known man in the business life of Canada, says: "I was terribly rundown and had to give up my work. I was forced to move to Europe. My nerves were in a bad way, and my sleep very disturbed. Then I got Dr. Cassell's Tablets. The first result was that I could sleep like a log. I had a rapid recovery, and was really astonishing how my strength and fitness came back."

Mr. Inniss is now in England, managing the Prinsepian and Publishers, Leeds. Letters will reach him there.

A patient of Dr. Cassell's Tablets will be sent to you on receipt of 5 cents for mailing and packing. Address: Harold J. Ritchie & Co., Ltd., 10, McCaul St., Toronto.

Sheriff's Sale

PROVINCE OF ALBERTA:

TO WIT:

BY VIRTUE of a Writ of Execution
and of the Supreme Court of Alberta,
as in the suit of A. KUNN,
Plaintiff,

MAPLE LEAF COAL COMPANY,

Defendant,
to me directed against the Lands of
Maple Leaf Coal Company, I have sold
and taken into Execution the following
lands, namely:

(1) North East quarter of Section 21,
Township 7, Range 3, West of the 5th
Meridian, containing 160 acres.

(2) North East quarter of Section 16,
Township 7, Range 5, West of the 5th
Meridian, containing 160 acres.

(3) Portions of the South West quarter
of Section 21, Township 7, Range 3, West
of the 5th Meridian, as described in
Certificate of Title H.Z.-80, containing 9.61
acres, excepting mines and minerals.

(4) Part of Legal Sub-Division 3 of
Section 21, Township 7, Range 3, West
of the 5th Meridian as described in Certificate
of Title H.Z.-180, containing 9.65
acres, excepting mines and minerals.

(5) Lots 17 to 21, inclusive, in Block
20, according to registered plan "Maple
Leaf 732-A.L.", as described in Certificate
of Title H.J.-170, excepting mines and
minerals.

(6) Lots 17 to 21, inclusive, in Block
20, according to registered plan "Maple
Leaf 732-A.L.", as described in Certificate
of Title H.J.-170, excepting mines and
minerals.

(7) All coal within, upon or under
the North West quarter of Section 16,
Township 7, Range 3, West of the 5th
Meridian as described in Certificate of
Title H.J.-177, containing 160.40 acres.

(8) All minerals other than gold or
silver, within, upon or under the West
half of Section 21, Township 7, Range 3,
West of the 5th Meridian, excepting 5.26
acres lying West of the Crows' Nest River,
8.25 acres for railway right of way
and 7.31 acres for roadway; as de-
scribed in Certificate of Title H.S.-123,
comprising 299.63 acres, which I shall
expose for sale on THURSDAY, the 23rd
day of AUGUST, 1917, at front of the

COURT HOUSE, MACLEOD, ALBERTA,
at the hour of 2.30 o'clock in the
afternoon.

SHERIFF'S — A. B. MACDONALD
OFFICE — Sheriff
July 17th, 1917 — Macleod Judicial
District.

Further terms and conditions of sale
and complete description of the proper-
ties may be obtained by application to
me.

A. B. MACDONALD,
Sheriff,
Macleod Judicial District.

NOTICE

Owing to the danger of Forest Fires, it is necessary to prohibit travelling or camping on the Crows' Nest Forest Reserve, except under permit. Such permits will be granted without charge by Forest Ranger J. H. Boulton, at Caledon, or may be secured from Provincial Police.

(Signed) R. M. BROWN,
Forest Supervisor.

Mrs. T. Murphy is, up from
Lethbridge on a visit to her mother,
Mrs. W. Howe.

The grand stand on the Regina
exhibition grounds was destroyed
by fire on Wednesday, the loss being
estimated at \$50,000.

Rather severe frost was experienced
throughout the Pass on Monday night, and we noticed that
several parties availed of the opportunity to go to Crows' Nest lake
to get a skate on.

The French chamber of deputies
by a unanimous vote adopted the
bill which had already passed the
Senate, providing that the state
shall assume the position of legal
guardian of all French war
orphans. It is estimated that this
act will cost the state one billion
francs a year.

Residents of Big Sag, west of
Sweet Grass, are somewhat alarmed
at the gradual sinking of about 80
acres of a ranch one mile from the
Lethbridge post office. The ground
has settled from eight to fourteen
feet, and left straight walls at
several points, smooth and per-
pendicular as though cut by a
knife. In a number of places
there are cracks several feet wide
to a depth of ten or twelve feet.

OF LOCAL AND GENERAL INTEREST

'Frankness From Frank' will
appear on Tuesday next.

W. A. Beebie returned from Wey-
burn on Wednesday morning.

Up to July 1st, the aggregate of
enlistments in Canada was 823-

Miss Cairns, of Medicine Hat, is
visiting with Mrs. W. Howe for a
few days.

The Justicia, a new British steamer
of 32,234 tons, has crossed the
Atlantic.

The value of the annual produc-
tion from Canadian mines has
grown, from \$10,000,000 to \$137,-
000,000 in forty years.

One of Blairstown's councillors,
who is noted "only for his self-
steem," was heard singing in his
sleep the other night, "Oh, could
I speak my matchless worth."

A convention of auto owners will
be held at the Paliser hotel, Cal-
gary, on Thursday, August 2nd.
We have not yet heard what dep-
tation is being sent from the
Pass.

The American steamer Kansas
was sunk by a submarine, recently,
off the coast of France. Four of
the crew of 50 are missing. The
vessel and cargo were valued at
\$500,000.

Eight hundred officers and men
of the Canadian expeditionary
forces and about one thousand
Canadian women and children from
England were landed at Halifax
on Sunday last.

Official messages from London
report that seventy-five Newfound-
land soldiers previously reported
missing, and the families of whom
had gone into black garb, on that
assumption, are prisoners of war at
Lindberg, Germany.

The Secretary-Treasurer of the
Town of Blairstown has received
his supply of stationery from the
foreign printing house, and we
notice that no appeal has been
made to that foreign house for
taxes. We are taxed because we
own property in Blairstown, we are
taxed because we carry on business
in Blairstown, we are taxed
because Blairstown's water system
must be supported and the bond-
holders must be kept away from
the gates of the town, we are taxed
because our main public institu-
tion—the school—must be main-
tained, and the most ridiculous of
all we are taxed to pay a bill
from a foreign house for material
that could have been had for a
smaller figure at home.

A fine of fifty pounds imposed
on a man who fed bread to his
pigs, and a fine of twenty pounds
imposed on a woman bakery man-
ager who permitted twelve loaves
of bread to be wasted, are striking
evidences that Great Britain is
deadly in earnest about food con-
servation and waste. Every Cana-
dian should assist to the utmost by
using foods that cannot be ex-
ported. A little study of the fam-
ily menu will show both rich and
poor ways in which the nation can
be helped to solve its most diffi-
cult war problem.

A teacher in the Frank school
was giving a lesson in mathe-
matics and English combined.
"A fathom," she said, "is a nautical
word used in defining dis-
tance. It means six feet. Now I
want some little girl to give me a
sentence using the word fathom."

Instantly a hand shot up in the
rear of the room.
"Well, Mary, you may give your
sentence."

Mary stood up proudly.
"Bartlett is a fathom, because he
has six feet."

Mrs. Roland Crawford and chil-
dren, of Lethbridge, are visiting
relatives in Blairstown.

It's a man's nature to crave
power and if he can't bully a man
or a dog he gets married.

One way of becoming a woman's
darling: A girl married a man
named Darling at Calgary this
week.

Mrs. E. Smith, of Calgary, is
spending a few weeks with her
husband at the Cosmopolitan hotel.

In making a goose Dame Nature
required a lot of quills, but a man
can make a goose of himself with
only one quill.

The Doukhobors who were found
guilty of burning Peter Vergin's
house at Vergin, Sask., have been
left off on suspended sentence.

Dr. DeMartigny intends to
purchase a Chevrolet car with the
hope to realize for his
famous 1898-model quadruped.

G. Gazzowski, of the West Canadian
Confectionery Co., left for a busi-
ness trip to Spokane and other
points on Wednesday morning.

Eight workmen were killed by
an explosion at No. 6 mine of the
Dominion Coal Company at New
Waterford, C.B., on Wednesday.

Mr. and Mrs. McKinnon,
of Lethbridge, were visiting Mrs. Mc-
Kinnon's parents, Mr. and Mrs.
James Patterson, here this week.

C.P.R. freight handlers at Cal-
gary quit work three times on
Wednesday, and threatened to go on
strike if alien enemies are em-
ployed.

Mike Rossie has moved his res-
taurant parlour to the old drug-
store building, and the store next
to the present Blairstown Pharmacy is
being converted into a pool room.

Eight persons were killed and a
number injured in a Hun air raid
on the east English coast on Sat-
urday morning last. One plane
was brought down by the British
anti-aircraft guns.

The municipal council of Paris
has fixed a super tax on automo-
biles of 42 per cent. of the sum paid
for the machine, and automobile
fenders are allowed eight gallons of
gasoline a week at \$1.20 per gallon.

In Japan's eleven shipbuilding
yards there are 189 steamers, each
exceeding 1,000 tons, now building
or on which work will soon be be-
gun. The government grants a
subsidy for each steamer. The
combined tonnage represents 948,-
034 tons.

An American army of 1,000,000
men for service abroad at once, in-
stead of the 500,000 contemplated
for the first draft, is foreseen by
the U.S. government's request
for an additional \$5,000,000,000
made to the senate finance com-
mittee on Tuesday.

Dad Thomas, the genial clerks'
supervisor in the store of F.M.
Thompson Co., is the latest ini-
tiative to the distinguished Order
of Waltons. Dad left for the
South Fork yesterday, and will be
a prominent figure along the banks
of that river for a week or so, or
until the Blairstown lovers of fish
meat shall want no more.

A delegation from Blairstown
Local Union, consisting of S. Jen-
sen, A. McDonald, P. Christopher
and O. Lagace, waited upon the
local committee of the Patriotic
Fund on Wednesday night, asking
that the U.M.W. of A. be given
proportionate representation. Af-
ter a little discussion it was decided
that the request be granted.

It costs seven cents to get your
hair cut in Japan. Here is a
chance for a good mail order busi-
ness.

Mes-dames Stubbs and Estridge
returned to Lethbridge this week,
after several weeks stay in Blairstown.

Mr. Crane got no sleep this
week. Roosters in his neighbor-
hood kept continually hollering
"Chautauqua."

Alberta College North has amal-
ginated with Alberta College
South, Edmonton, and will both
be managed by one board.

J. E. Gillis and J. B. Harmer
will attend the South and North
Alberta Patriotic Fund convention
at Calgary on Thursday next.

G. Marinato, of the Lethbridge
Macaroni factory, has secured a
\$500,000 contract for macaroni
from the British government.

Overalls for women have not
shown up in Lethbridge, but if
some of the skirts continue shrink-
ing they will certainly appear before
long.

The board of grain commis-
sions for Canada have ruled that
dating from August 1st, 1917, the
maximum price of wheat shall not
exceed \$2.40 per bushel.

Joyce Bros., of Rock Creek, near
Fernie, lost \$15,000 worth of lumber
in a bush fire on Thursday of
last week. The east Kootenay
men also lost a large quantity of
logs the same day.

Well, this is strange! Immediately
following the establishment of a
weekly newspaper in one of the
rural districts of Alberta, seven
births occurred in one week. It
takes the newspaper to stir them up!

Several towns in Alberta have
been put on the Chautauqua list
this summer. Among them have
been Lethbridge, Wetaskiwin, Hard-
isty and Camrose, and others are
said to be arranging. It is an inno-
vation in western Canada, but
seems to have taken well. The
program has been largely musical
and of the entertainment order,
but there has also been some
speaking and lecturing. In most
of the places, at any rate, the enter-
tainments have been offered at
reasonable prices. Six-day tickets
at \$2.50 ought to give value for
value, and the scheme has, in fact,
been very well received.

A rumor was being circulated in
town this week to the effect that
Blairstown was to have a new weekly
paper, to be financed by Joseph
Little and others and to be edited
by Councillor O. Lagace.

A soldier and a civilian won the
reputation of being the most plucky
individuals in the audience at the
opera house on Tuesday night.
They actually gathered up courage
to kiss a made impersonator of a
young lady.

Mr. and Mrs. T. Madden, of
Lethbridge, accompanied by Mrs.
R. Steeves and Gordon Steeves, of
Calgary, and Mrs. Payne of Calgary,
paid Blairstown a visit by auto
on Wednesday and were guests at
the Cosmopolitan.

The Ferrie Free Press says that
there is a steady stream of miners
coming back to the local mines,
and it will not be long before com-
munity will be normal again. When
men can make six or seven dollars
a day in the mines, other occupa-
tions do not appeal to them.

At the insistence of Lieut.-Col.
J. S. Dennis, two German waiters
were removed from the luncheon
in New York where Lord North-
cliffe and the Canadian Highlanders
and Gordon McLean pipers
were the guests. The management
of the hotel complied with the
demand.

The rumor circulated through
the Pass last week end, to the
effect that the McLaren lumber
mill at Crows' Nest had been
destroyed by fire, was incorrect,
for the properties of the McLaren
Lumber Co. were not even endan-
gered. Fire crept up to the base of
Crows' Nest Mountain and wiped
off a quantity of tangled brush
there, but the change of wind on
Friday night carried the consum-
ing elements in a northwesterly
direction, and no damage to any
existing was done to the McLaren
property.

Rev. W. F. Gold, of Edmonton,
occupied the pulpit of Central Un-
ion church on Sunday morning
last.

Mr. Crane got no sleep this
week. Roosters in his neighbor-
hood kept continually hollering
"Chautauqua."

Alberta College North has amal-
ginated with Alberta College
South, Edmonton, and will both
be managed by one board.
